

## Question and Answers 10/28/10 (2)

Question #1: Is the PS1 PMA cart compatible with the PS2 dome door which limits the width of the PS2 PMA to a maximum value of 2400 mm?

Answer: The PS1 PMA cart is “compatible” in width with the current PS2 enclosure door, but its wheels are not compatible with the current PS2 enclosure rails. The PS1 PMA width is not compatible with the PS2 enclosure door. (10/28/10)

Question #2: Does the filter mechanism slide into the LCC from one direction? Can the instrument cable wrap obstruct the filter mechanism installation pathway from one direction as long as the other direction is unobstructed?

Answer: Yes. The filter mechanism slides in from one side. The vendors are encouraged to pay attention to specifications 4.7.3.3.1, 4.7.3.3.2, and 4.7.3.8.2 and the notes therein. Yes, the cable wrap may obstruct the filter mechanism from being removed from one side as long as the other is free for the filter mechanism installation. (10/28/10)
